

Jay Thanki

Software Developer

I love programming because it enables me to bring an idea to life. I also love solving problems, learning, and growing my knowledge of computer science.

EDUCATION

University of Greenwich

MSc Computer Science

2022 - Present

Dharmsinh Desai University

Bachelor's in Information Technology

2017-2021

SKILLS

- Web Development
- Full-Stack Development
- React, Node JS, MongoDB
- Working knowledge of JavaScript, Java, C, C++, and Python
- DBMS
- Problem-Solving
- Data Structures and Algorithms

WORK EXPERIENCE

Jr. Software Engineer

09/2021 - 03/2022

Nividous Software Solutions | Ahmedabad, India

I worked on a project that used Computer Vision to scan data from pdf files and display it in the preferred format. One of my contributions was creating an OOP system which enabled important data access from any module.

Software Developer Intern

11/2020 - 05/2021

NewAge Technologies | Junagadh, India

I worked on a project which evaluates freight rates of various couriers based on certain conditions using ML models. I used technologies such as Python, Pandas, Matplotlib, Seaborn, and Django.

PROJECTS

1. Habit Tracker

A tool to track your habits
